- CO3 Remind and write concepts related to quantum mechanics and classical mechanics
- CO4 Introduction classification of solid on band theory, Fermi energy, density of states, effect of temperature on Fermi level, Zener diode, LED, solar cell, photo conductive cell.
- CO5 Transistors-types and working, transistor as an amplifier, oscillator.

## 18. Course Outcomes (Cos) in Chemistry

CO1 Stereochemistry, conformational isomerism, conformational analysis and stability of alkane and cycloalkane.

CO2 Synthesis and reactions of naphthalene, anthracene and phenanthrene.

CO3 Study of pyrrole, pyridine, quinoline and indole

CO4 Name reactions, mechanistic approach and applications.

CO5 Green chemistry principle and process

CO6 Electrochemistry, Debye-Huckel theory, Hittorf's rule, Kohlrausch law, Henderson's equation, Numerical problems.

CO7 Concept of entropy, Third law of thermodynamics, Numerical problems.

CO8 Third order reactions, Methods to determine order of reaction, Numerical problems

CO9 Physical properties of liquids, Surface tension, Viscosity and Refractive index.

## 19. Course Outcomes (Cos) in Mathematics

CO1. Students will be able to explain the core ideas and the techniques of mathematics at the college level.

CO2. Students will be able to apply rigorous, analytic, highly numerical approach to analyze, execute tasks and solve problems in daily life and at work.

CO3. Students will be able to recognize the power of abstraction and generalization, and to carry out investigative mathematical work with independent judgment.

CO4. Students will be able to set up mathematical models of real world problems and obtain solutions in structured and analytical approaches with independent judgment.

CO5. Students will be able to carry out objective analysis and prediction of quantitative information with independent judgment.

CO6. Students will be able to demonstrate a systematic knowledge of learning processes and a professional attitude in classroom teaching of mathematics and IT;

CO7. Students will be able to communicate effectively about mathematics to both lay and expert audiences utilizing appropriate information and communication technology.

CO8. Students will be able to work independently, and to collaborate effectively in team work and team building.

CO9. Students will be able to conduct self-evaluation, and continuously enrich themselves through lifelong learning.

CO10. Students will be able to communicate to lay audiences and arouse their interest in the beauty and precision of mathematical arguments and science.

CO11. Students will be able to recognize the importance of compliance with the ethics of science and being a responsible citizen towards their community and a sustainable environment.

## **20. Course Outcomes (Cos) in Microbiology**

CO1: To make the students knowledgeable with respect to the subject and its practicable applicability.

CO2: To promote understanding of basic and advanced concepts in microbiology.

CO3: To expose the students to various emerging areas of Microbiology.

CO4: To prepare students for further studies, helping in their bright career in the subject.

CO5: To expose the students to different processes used in industries and in research field.

CO6: To develop their ability to apply the knowledge of microbiology in day to day life.

CO7: To prepare the students to accept the challenges in life sciences.

CO8: To develop skills required in various industries, research labs and in the field of human health.

## **Course Outcomes (COs)**

### **M. Com. Programme (M.com. I & II)**

#### **21. COs of M. Com. I Business Management Sem. I**

**CO1** Understand the theoretical aspects of management and strategic management

**CO2** Describe the theoretical aspects of management and strategic management

**CO3** Understand the contemporary issues in management.

#### **22. COs of M. Com. I Managerial Economics Sem. I**

**CO1** Student should be able to understand the variable and components of Managerial Economics

**CO2** Students should study the applications of demand analysis and concepts related to consumer's behaviour.

**CO3** Students should be aware regarding production, price determination and pricing practices and they should be able to apply these in business decision making policies.

**CO4** Students should understand the business cycle phenomenon and inflation for business decision making.

**23. COs of M. Com. I Advanced Accountancy Sem. I**

**CO1** Understanding concept of accounting standards and practical implication of AS-1 and AS-2

**CO2** Familiarity with preparing final accounts of service industries.

**CO3** Perfection in preparing the consolidated financial statements of the holding company and its subsidiaries.

**CO4** Understanding of preparation of financial statements of insurance companies with schedules.

**24. COs of M. Com. I Advanced Accountancy (Auditing) Sem. I**

**CO1** To understand the basic concepts and objectives of audit

**CO2** To gain working knowledge of generally accepted auditing procedures

**CO3** To identify the skills and techniques of conducting audit of various entities

**CO4** To know the recent trends in practice of audit

**12. COs of M. Com. I Organizational Behaviour Sem. II**

**CO1** Describe theoretical concepts of organizational Behaviour.

**CO2** Classify types of personalities

**CO3** Summarize types of conflicts.

**CO4** Summarize adoption of organizational culture.

**13. COs of M. Com. I International Business Sem. II**

**CO1** Students will understand the global economic and business world.

**CO2** Students will be equipped with proper knowledge, abilities and skills of the international business environment.

**CO3** Students will get acquainted with the functions and mechanisms of international financial institutions.

**CO4** Students will enable with the knowledge of the plans and strategies to succeed at an international business platform.

**14. COs of M. Com. I Advanced Accountancy Sem. II**

**CO1** Familiarity with accounting of business combinations of companies.

**CO2** Perfection in accounting of different types of cooperatives.

**CO3** Understanding the accounting for lease.

**CO4** Understand the concepts of social responsibility accounting, environment accounting and human resource accounting.

**15. COs of M. Com. I Advanced Accountancy (Research Methodology) Sem. II**

**CO1** Familiarity with basics of research.

**CO2** Designing research protocol for research problems.

**CO3** Preparation of the instrument for data collection.

**CO4** Ability of analysis and interpretation of data.

**M.A. Programme (M.A. I & II)****Course Outcomes: (Cos)****16. Course Outcomes of M.A.-I Micro Economic Analysis (EC-1) Sem. I**

CO1: Understand the fundamentals of microeconomics

CO2: Get an introduction to supply and demand and the basic forces that determine equilibrium in a market economy

CO3: Get introduced to the framework for learning about consumer behaviour and analyzing consumer decisions

CO4: to study about firms and their decisions about optimal production

CO5: to solve basic microeconomic problems

CO6: Use the fundamental techniques to think about a number of policy questions related to the operation of the real economy.

CO7: to understand introductory microeconomic theory in a local, regional, national and international scenario

CO8: Get an introduction to supply and demand and the basic forces that determine equilibrium in a market economy

**17. Course Outcomes of M.A.-I Monetary Economics (EC-2) Sem. I**

CO 1: Theories of demand for money and supply of money, measures of money supply in India

CO 2: Inflation, deflation, stagflation, Phillips curve, stabilization policies

CO 3: Meaning and theories of business cycles- Hawtrey, Keynesian, Schumpeter, Cob-web theories

CO 4: Banking- commercial banks, central bank, rural banking, non-banking financial intermediaries

CO 5: Financial markets with reference to Indian financial markets, financial reforms in India.

**18. Course Outcomes of M.A.-I Economics of Environment (EO-1)**

CO1. Realize the importance and influence of environment on the economy including the quality of manpower. Arouse their feelings to make cleaner environment so as to achieve harmonious development.

CO2. Understand that environmental problem is not the problem of a single country or region but a global problem/issue. Hence, policy formulation may be for all countries.

CO3. Demonstrate the scientific management of waste materials; realize the role and importance of individuals to keep the environment clean.

CO4. Understand the causes and victims of environmental pollution like poverty, population explosion, and over-use of resources, careless or unscientific dump/management of wastes.

CO5. Suggest appropriate measures to correct environmental degradation, aware of those ingredients such as healthy climate, quality of human beings, domestic and other natural habitats and biodiversity levels, productivity and productions, sustainability, etc. are all influenced by environment.

#### **19. Course Outcomes of M.A.-I Principles and Practice of Co-operation (EO-4)**

CO1: To understand the genesis, nature and principles of co-operation in India

CO2: To compare co-operative enterprise with other enterprises

CO3: To study the growth of co-operative movement in India

CO4: To learn various sources of agricultural credit in India.

CO5: To examine the working of agricultural credit societies and co-operative banking in India.

CO6: To gain knowledge of nature, types and arguments for and against co-operative farming.

CO7: To analyze the role of dairy co-operatives in India.

#### **20. Course Outcomes of M.A.-I Public Economics (EC-3) Sem. II**

CO1: Development of an understanding of public sector financial resources.

CO2: Understanding of the rationale for the existence of modern governments

CO3: Familiarity with the micro and macro aspects of public expenditure.

CO4: Acquaintance with the phenomenon of externality and the role of government.

CO5: An understanding of the mechanics of government budget.

#### **21. Course Outcomes of M.A.-I Ecological And Resource Economics Sem. II**

CO1: Demonstrate detailed knowledge of the alternative ways of modeling the interaction of the economy and the environment.

CO2: Analyze how and why environmental problems can be modeled as cases of market failure/externalities.

CO3: Evaluate the advantages and disadvantages of various environmental policies.

CO4: Critically discuss the characteristics and properties of measures of benefits and benefit estimation procedures and their applicability to specific situations.

CO5: Define the basic conditions of the optimal use of renewable and exhaustible resources.

CO6: Evaluate cost-benefit analysis procedures intended to address issues related to preservation and conservation.

**22. Course Outcomes of M.A.-I Agriculture Development in India Sem. II**

CO1: Knowledge about the importance of agriculture.

CO2: Understand the contribution of Agriculture to income and employment in India.

CO3: Know the sources of Agriculture Finance In India.

CO4: Analyze the impact of agriculture subsidies in India.

CO5: To study about theories of agriculture and recent trends in agriculture growth in India since independence.

CO6: To study of the concept of land reforms in India and importance of tenancy reforms in India.
