Student Satisfaction Survey (SSS)

2022-2023

REPORT

The online student satisfaction survey conducted at Shri Shiv Shahu Mahavidyalaya, Sarud for the academic year 2022-2023 aimed to gauge the satisfaction ratio of students with regard to overall performance of the college in multiple areas. The questions pertaining to curriculum competition by teachers, their preparation for the classes, their ability to communicate with the students, teaching approach adopted by them, the evaluation process and post evaluation discussion with students, the social and emotional growth of students, their competencies with regard to POs and Cos, guidance from teachers in identifying and overcoming their weaknesses, encouragement given to students in activity participation, use of ICT, sanitary access, library facilities provided, and overall quality of teaching and learning process are the key areas which students are expected to respond to in the said survey.

As a result, 52.3% (67) learners expressed their 'complete satisfaction'. This shows a strong positive sentiment among major portion of the student body.

43.8% (56) students reported being 'satisfied' which reflects a positive outlook on the institutions overall performance. If this is combined with the very satisfied category, it indicates an overall positive satisfaction rate of 96.1%.

A small group of 3 students with 2.3% have taken a 'neutral' stand. However, this could also be taken as a need for further exploration into specific aspects that might not be meeting with the expectations of this group. Again, this group may be taken as an indicator of many other students who are not in the respondent group.

0.8% of only 1 student respondent is 'not satisfied' and equal percentage reported being 'very dissatisfied'. While these percentages are low, it is very crucial to address the concerns of these individual students to maintain a high overall satisfaction rate.

To sum up, though on one hand the high satisfaction rate is commendable suggesting a healthy learning experience, the minor dissatisfactions should not be overlooked. If these concerns are addressed properly, the small group of 'not satisfied' students can contribute to an even more favorable overall satisfaction rate. Nevertheless, this survey indicates a predominantly positive sentiment among the student community of the institution. However, it is essential for the institution to remain proactive in addressing the concerns of the so minor group of students and continuously strive for improvement in all aspects.
